

Health Passport Features

ADT Notifications Module

Superior HealthPlan's Health Passport is a web-based, secure health information tool built using core clinical and claims data. This tool delivers relevant health-care information when and where it is needed for foster children in the state of Texas. Health Passport helps providers, state users and Service Coordinators improve care coordination, eliminate waste and reduce errors by providing a member's medical history and health interactions as the member progresses through the clinical process. Medical Consenters, appropriate Texas Department of Family and Protective Services (DFPS) and Texas Health and Human Services (HHS) staff, participating providers and Superior HealthPlan will have access to detailed member health information.

Once securely logged into Health Passport, providers can access the Admission Discharge and Transfer (ADT) Notifications Module by clicking on ADT in the left navigation bar.

The ADT Module provides the following data:

- Date and time of discharge
- Admission type
- Facility name
- Discharge Disposition Code

The ADT data is transferred in real time from the following Health Information Exchanges (HIEs) services: HASA, Greater Houston Health Connect (GHHC), Integrated Care Collaboration (ICC) and Rio Grande Valley Health Information Exchange (RGV)

The screenshot shows the "Health Passport: LUCY DUCK" interface. The left navigation bar includes options like Face Sheet, Contacts, Allergies, Assessments, Growth Chart, Immunizations, Labs, Medication History, Patient History, and ADT (highlighted with a red box). The main content area is titled "Admission Discharge Transfer" and shows a table of ADT notifications for the last 12 months. The table has columns for Date & Time, Type, Facility Name, and Discharge Disposition. All entries show "Emergency Room Visit" at "Marietta Memorial Hospital" with a "01" disposition code. A "Show: 10 entries" dropdown and "1-5 of 5" indicator are visible at the bottom.

Date & Time	Type	Facility Name	Discharge Disposition

Please Note:

- Some older data may be missing the time due to how it was stored in a previous database or if was stored in a database not compatible with the ADT module. The ADT module only displays information from HIEs listed above.
- ADT does not contain a comprehensive list of STAR Health (foster care) members.

To see a list of discharge disposition codes and facilities that provide ADT data, please review the next pages of this guide.
