

**STAR Health Webinar Recording:
Service Array for Children with Intellectual and Developmental Disabilities (IDD)
Quiz**

1. IDD can be traced to genetic conditions, problems before, during and after pregnancy, poverty and cultural deprivation, abuse (sexual, emotional, physical and neglect) and substance use during pregnancy.

True
False

2. Section 1915(b) – Managed Care Waivers and Section 1915(c) – Home and Community-Based Services Waivers can be used in combination for children in conservatorship with Texas Child Protective Services.

True
False

3. Check all the ways to detect the possibility of IDD:

Loss of skills
 Neurological evaluation
 Newborn screenings
 Not meeting developmental milestones
 Psychiatric evaluation
 Psychological testing
 Report cards
 School screenings
 Well child checkups

4. In eliminating abusive, aversive treatment strategies, we can focus on treatment that helps the individual meet their potential for physical and behavioral health. These treatments include all except (check all that do not apply):

- Applied behavioral analysis
- Aromatherapy
- Behavioral therapy
- Care Management
- Early interventions
- Immunizations
- Isolation
- Nutritional counseling
- Occupational therapy
- Physical therapy
- Private duty nursing (PDN)
- Recreational therapy
- Special education
- Speech therapy
- Timely physical examinations
- Transition services

Answer Key:

- 1. True
- 2. True
- 3. All are included
- 4. Isolation
